Import Promotion Desk

IPD Companies at a glance

Discover the right partners for your digital services & products.

IPD connects you with carefully selected IT companies from Tunisia.

Import Promotion Desk (IPD)

Your path to vetted IT partners

In today's dynamic, digital landscape, it is crucial for European companies to establish strong partnerships with the right IT providers to maintain their competitive edge. Whether you are looking for specialised IT services or products, finding suitable partners often involves breaking new ground.

The ever-growing demand for digital solutions such as software development, cybersecurity, AI and other IT-supported services requires efficient collaboration with specialised providers. However, Europe lacks experienced IT professionals. In contrast, talented and well-qualified IT companies in IPD partner countries are ready to deliver innovative solutions to meet the digital needs of European companies.

The IPD identifies and reviews suitable providers who impress with their expertise, as well as the the latest technologies and methods. The IPD experts evaluate companies' technical capabilities and service portfolios according to strict quality standards.

Our assessment takes into account compliance with European standards and data protection regulations, as well as certificates such as ISO 27001 and ISO 9001. We also consider aspects such as reliability and commitment to sustainable development.

Our careful pre-selection process guarantees you access to carefully selected service providers who can deliver high-quality, secure solutions.

On the following pages, we present a selection of these pre-vetted companies. They have international project experience and cover key areas of the digital value chain – from AI and cloud architectures to customised software solutions for logistics, fintech, healthtech and retail.

Take advantage of our neutral and free matchmaking service to find your reliable IT partner and benefit from verified digital expertise from selected partner countries.
